

## Medicine prices in Kenya – addendum to survey report

Following completion of the survey, it was noted that the reference price used for artemether + lumefantrine 20mg/120mg tabs was 0.1 (unit price for Coartem supplied through the Novartis/WHO partnership) whereas the MSH 2003 price was 0.3833. The database was amended accordingly.

Performing new calculations with the amended data has little effect on the median MPRs for the innovator brands surveyed in the private and mission sectors, and does not affect the conclusions drawn or recommendations made in the report.
